ROSES IN POTS, GRAPE VINES, FIGS, etc., etc.

An Alphabetical Index of every item contained in this List will be found on the latter pages.

# CLIBRANS' List of INDOOR PLANTS.

Portion of a group of Calla Elliottiana and Pentiandli, Tree Carnations and Foliage Plante, exhibited by us at Manchester.

## OUR SPRING LISTS.

The system of issuing a separate List for Dahlias, Indoor Plants, Herbaceous and Alpine Plants, Bedding Plants, and Sundries, tried last Spring, has, we are informed, been found more convenient to the majority of our customers than the one large list embracing all the plants bought in Spring. We find it more costly for printing and postage, but being anxious to issue the Lists-in the most generally accepted form, we are following the same system this Spring. We should like to know from our customers generally their opinions, and also welcome suggestions to improve the Catalogues and make them more generally useful. It may be of interest to mention that we issue about 175,000 copies of our various Lists yearly, at a cost of about £1,000 for printing alone. In addition to this we pay postage on all Lists we send out.

#### **OUR EXHIBITS** have been awarded **COLD AND SILVER MEDALS, DIPLOMAS AND CERTIFICATES** BY THE LEADING HORTICULTURAL SOCIETIES IN

GREAT BRITAIN AND IRELAND.

# Cheap Collections of Indoor Plants.

The following collections are of exceptional value. At the low prices quoted the selection of varieties must be left entirely to us, except that as far as possible we will omit sorts that customers already have, if required to do so. In the majority of cases the plants are in small pots and intended for Spring delivery; later in the season when they are potted on, higher prices will be charged in some cases.

The next edition of our List of Indoor Plants will be published on March 1st, 1908. Supplementary Lists of the latest noveltics will be issued from time to time as required. Novelties, new and rare plants, will in all cases be charged at the prices current when the order is executed.

PLEASE NOTE.—It is our endeavour to include only the best varieties in all classes of plants that appear in our various catalogues. To ensure this, we have at frequent intervals, to discard varieties that do not reach the standard of excellence we require. If, however, any variety of plant not included in this List is required, we shall be pleased to supply, if in commerce, at current prices. Extra-sized and specimens of many classes of plants can be supplied; we shall be pleased to quote prices and give full particulars on application.

# CLIBRANS' INDOOR PLANTS

FOR STOVES, GREENHOUSES, CONSERVATORIES, &c.

# Abutilons.

A class of greenhouse plants requiring similar treatment to Fuchsias. Handsome pendulous blossoms, striking and effective, invaluable for decoration, cutting, vases, baskets, training on pillars rafters, &c. Turfy loam, peat, leaf-mould, and old manure with coarse sand suits them well.

4d. each, excepting where priced. Twelve sorts, our selection, 2/6.

# No. 3 Boule de Neige, white, exquisite. 21 elegantissimum, rosy red; fine form. 24 Fremiet, pale cream, large, good grower. 26 General Gallieni, rich crimson, striking. 30 Golden Bells, bright yellow, one of the best. 33 Jules Paquet, rich fleshy rose. 42 La Fournaise, bright crimson. 44 Lemoineii, beautiful pale yellow. 46 Le Nain Rouge, reddish orange. 49 L'Africane, rich crimson.

53 M. H. Cannell, golden yellow, crimson throat.

No.

- 54 Princess of Wales, pink, veined rose.
- 56 Seymour, rose-pink, darker veins.
- 61 Triomphe (new), rose, veined salmon, very large; a beautiful variety. 9d.
- 63 Triomphe de Quedlinburg, foliage ivory and green, dwarf, but free.
- 66 **Thompsonii**, foliage mottled bright vellowish green.
- 76 Vexillarium variegatum, foliage green, and ivory white. 6d.

Seed saved from the finest named varieties, 1/- per packet.

# Amaryllis (Hippeastrum).

Large lily-like blossoms of various colours. Loam, leaf-mould, and well-rotted manure with some coarse sand is the best compost, the pots should be well drained. Start the bulbs in heat, and when in growth water freely, apply weak liquid manure occasionally. After flowering, water sparingly until quite dry, then store away under the stage until new leaves appear.

Seed saved from the finest named hybrids, 2/6 per packet.

# Azalea Indica.

Well-known plants for greenhouse and conservatory decoration. They bloom early in the year, and can be had in flower for some months. Fine plants set with buds in choicest colours and variety,  $\frac{2}{2}$ ,  $\frac{2}{6}$  and  $\frac{3}{6}$  each  $\frac{21}{2}$ ,  $\frac{2}{6}$ ,  $\frac{20}{6}$  to  $\frac{36}{6}$  per dozen.

# Azalea, Chent and Mollis.

Popular plants, very showy and useful for indoor decoration. If placed in a stove they may be brought into flower early in the year; before the flowers are fully expanded remove to a cooler house, where they will last for a long time in full beauty. The colours embrace a variety of shades in orange, yellow, red, salmon, &c.

Fine plants, of either class, set with buds, 1/6 and 2/6 each; 18/- and 24/- per doz. Plants of either class, without buds, 1/- each; 0/- and 12/- per doz.

DAVIESH, magnificent pale sulphur, changing to white, sweet-scented, splendid for forcing, 2/- and 2/6 each.

# Clibrans' Begonias-Tuberous Rooted.

Careful fertilisation and selection over a period of many years has resulted in Tuberous Begonias of the highest excellence. Our aim has been to produce dwarf habit, freedom in the production of large flowers in clear and well-defined colours and shades carried upright on stout stems. In this we have succeeded. We cordially invite inspection when in bloom from the beginning of July until the middle of September.

cultural Note.—Begonia tubers should be started into growth any time from February to March, the tubers intended for bedding being placed in boxes. A mixture of good loam, leaf mould, and coarse sand, with well-rotted manure, is the best compost. Pot firmly, placing the tubers just below the surface of the soil; the potting compost should be moistened before use. Allow plenty of drainage, and place any rough portions of soil at the bottom over the crocks. Water sparingly until the plants are growing freely, and re-pot into larger pots as required. In the growing season, especially during hot weather, water freely, and on no account allow the plants to become dry. Plenty of air and light are essential at all stages of their growth, and when grown under glass the flowering plants require to be shaded from the sim during the hottest part of the day. After flowering gradually withhold water until the tops die down, when the tubers should be placed in sand or cocoa fibre, and stored away in a cool dry place. Examine occasionally to see if any signs of decay.

# Double Flowered Varieties.

TUBERS, Choice unnamed double varieties, to colour, 1/-, 1/6 to 2/6 each; 9/-, 12/-, 18/- and 24/- per doz.

Mixed Seedlings, unbloomed, containing a large percentage of doubles, 6/- and 9/- per doz.

Seed of our superb Double Strain, 2/6 per packet.

# Choice New Varieties. Plants ready in May.

The novelties show a marked advance over previous introductions. They are characterised by their vigorous constitution and erect flowers, embracing several distinct colours and charming shades.

# New Decorative and Bedding Variety.

272 Washington. Award of Merit R.H.S., brightest scarlet; flowers are rather small but produced in trusses in the utmost profusion; wonderfully tenacious and lasting; contrasting against the dark green foliage, and giving a dazzling beautiful effect; dwarf habit, rarely exceeding 9 in. in height; for decorative effect, as a pot plant or for bedding it is unequalled. We know of nothing more free, beautiful or effective than this superb variety. 1/6 each, 15/- per doz.

# General Collection. Plants ready in May.

Seed from specially selected double varieties; per pkt. 2/6,

The following embrace the best in cultivation. In addition to sterling varieties of our own raising we include meritorious varieties from various sources.

# Begonias specially suitable for Bedding.

- 491 **Duke Zeppelin** (Count Zeppelin).—Splendid variety as a decorative plant in pots or for bedding. Flowers rich scarlet, double, and almost creet, metallic-coloured foliage. Exceedingly free, dwarf and bushy. Blooms from early summer to late autumn. Price, 6d. each; 4/6 per dozen.
- Lafeyette (see page 5).
- 138 Lord Langton (see page 5).
- 272 Washington (new). See page 5.
- 215 Worthiana, single, rich orange-coloured blossoms of extreme beauty; a grand variety for bedding purposes. 6d, each; 4 6 per dozen.

# Clibrans' Single Begonias.

A characterised by a dwarf sturdy habit tull-grown plants are seldom 12in. in height. They bear large brilliantly-coloured flowers on tift upright stems, so that the flowers are all open to the eye, without the aid of sticks and tying. The improvement has been so marked that we have discarded almost the whole of our single-named kinds, the seedlings being of better habit, freer in blooming, more brilliant in colour, and larger in size.

# Dry Tubers. Selected to Colour.

Crimson, Searlet, White or Yellow, 4/6 per doz., 30 - per 100 Red, Pink, Dark Rose, Blush or Salmon, 4/- doz., 25 - per 100. Mixed Colours, 2, 6 doz., 17/6 per 100. Extra Fine Selected, 6 - 4/- and 1 - per doz.

We also offer above as plants in 3in, pots in May, at an advance of 6d, per dozen or 4/- per roo on above prices.

Seed of this superb single strain, 1 and 2,6 per pkt.

# Sweet-scented Single Begonia.

288 Baumanni, a charming species, flowers of large size, and bright rose colour, slightly perfumed. Admirable for conservatory decoration. Each 1/-

# Clibrans' Superb Crested Begonias. (Begonia Hybrida Cristata.)

A distinct and beautiful type, flowers of large size and fine form, each petal carrying a cocks-comb-like crest extending from the base and spreading outwards until it terminates in a series of charming undulations just within the margin of the petal. These Begonias are of strong constitu-tion, carrying the flowers on erect stems. They embrace a wide range of colour, from pure white to deep crimson.

Price—Tubers, in a choice selection of colours, 9d., 1/- to 1/6 each; 6/-, 9/- and 12/- per dozen. Seed saved from the finest varieties, 1/6 and 2/6 per packet.

# Young Seedling Begonias.

During April and May we can supply young plants of Begonias from boxes grown from our own seed as follows :-

Singles, white, crimson, scarlet, rose, pink or yellow, 2/- doz.; 10/- per 100.

Singles, Mixed Colours, 1/- per doz.; 5/- per 100. Doubles, mixed colours, 2/- doz.; 10/- per 100.

Crested, white, scarlet, yellow, rose or pink, 3 - per doz.; 15- per 100. Crested, mixed, 2- per doz.; 10- per 100.

# Autumn and Winter Flowering Begonias.

301 AGATHA, Award of Merit, R.H.S. In appearance it resembles Gloire de Lorraine, but the flowers are larger and richer, whilst the habit is more compact. A valuable addition to winter-flowering

Begonias. 1/303 AGATHA COMPACTA, Award of Merit,
R.H.S. This is the dwarfest and one of the most attractive winter-flowering Begonias. Charming rosy-pink, produced with the utmost freedom. The plants are from 9in. to 12in., and admirably suited for pot culture, as they require little staking. The Gardeners' Chronicle says: "The growths being so numerous the display of rich pink-coloured flowers is most prodigal." 1/6.

305 ALBA GRANDIFLORA, of the type of Gloire de Lorraine, and similar in colour to Turnford Hall, vigorous grower, excellent habit, and profuse bloomer, 1/-

348 ENSIGN, light earmine, toned with scarlet, semi-double, very free. Award

of Merit R.H.S. 2/

368 GLOIRE DE LORRAINE, an extremely beautiful plant. The delicate colouring of its flowers and the freedom with which they are produced make it unique in beauty. Bright green foliage, unique in beauty. Bright green toliage, covered with long sprays of bright rose-coloured flowers. Blooms from October until Spring. Vigorous, remarkably profuse bloom, the plants both small and large, are clothed with drooping clusters of lovely flowers. 6d., od. and 1/- each; 4/-, 6/- and 9/- per doz.

461 WINTER CHEER, Award of Merit R.H.S. Flowers over 3in. across, semi-double, of a pleasing shade of rosy-carmine, much resembling in the segments those of a camellia, and last over six weeks in perfection, 2/Our selection of 6 lovely varieties of

"Winter Blooming Begonias" for 3/6

or 5/-

# Perpetual Flowering, or Evergreen Begonias.

Easily grown, very beautiful, profuse bloomers.

These are most suitable for Greenhouse and Conservatory decoration, they produce their pretty flowers during the Summer and Autumn in profusion. A mixture of loam and leaf-mould, with a little sand and manure, is the best compost. Plenty of water should be given during the growing season.

#### Choice Recent Varieties.

No.

- 310 Augustini, beautiful rose, in large heads; a valuable addition to our decorative plants. 1/6.

- 31 rosea multiflora, bright rosy-pink, attractive.
- 36 Vreelandi, pure white, good habit.
- 37 White Bouquet, white, dwarf.

## Cacti.

Cactaceous plants are unique in appearance, and many of them produce flowers of the utmost brilliancy from white to intense crimson, many of them being fragrant, they are at once singular and beautiful.

Ordinary loam and coarse and or gravel suits them; sufficient of the latter should be used to secure drainage, as the plants resent anything approaching stagnation. A temperature of about 50 degrees in Winter suits the majority during the Summer a higher temperature is required.

The best species and varieties of Cereus, Echinocactus, Echinocereus, Mammilaria and Phyllocactus are offered; our selection as follows:-

Six in 6 beautiful and distinct sorts, 3/6, 4/6 and 6/-; 12 in 12 beautiful varieties, 6/-, 0 - and 12/-

Pilocereus Senilis (The Old Man Cactus) is one of the most interesting of all Cacti. The plant is covered with long silky-white hairs, causing it to resemble the hoary head of an aged person, well-established plants, 2 6 to 3.6 each.

# Caladiums.

Highly ornamental plants, grown for the great beauty of their leaves. They make beautiful ornaments for table decoration, and their suitability for Exhibition is well known. A compost of turfy loam, leaf mould and peat—in equal parts—with a little manure, and a good sprinkling of sharp sand suits them; shade for a few hours in the middle of the day from the sun's direct rays may be necessary, but the more they are exposed to the light at other times during growth the richer and more beautiful will the foliage be.

Purchasers' selection, 1/- each, 10/6 doz., excepting those priced; large plants of some varieties 1/6 and 2/6 each.

Twelve fine varieties, our selection, 6/-, 9/- or 12/-

#### No.

- gyrites, small leaves, vivid green, marbled silver; one of the best for 13 argyrites, eutting and table decoration.
  - 7 amænum, rose, ribs red-rose, veined violet-rose, green margin.

- green, red veins. 2/-174 **Vandyke,** rose-pink, bright red veins, green margin.
- 182 Vesta, greenish-white veins, leaf spotted

NOTE.—We shall be pleased to supply any plants not included in this List, if in commerce, at current prices.

# LANDSCAPE WORK

In all its branches. The laying out of new and the re-modelling of existing grounds carried out in the best style, either from our plans or those of our Patrons. Correspondence invited on all matters connected with this class of work.

# Calceolarias—Herbaceous.

#### Clibrans' "Gold Medal" Strain.

# Awarded numerous Medals at various Shows during the last few years.

Our "Gold Medal" strain of Herbaceous Calceolarias is unsurpassed. The plants are of a dwarf and vigorous strain, flowers large in a wide range of colours, from pure selfs to the most finely-spotted and blotched forms. Wherever exhibited, our strain has met with the most unqualified approval. Visitors to our Nursery during the flowering season have been astonished by the magnificent display of this favourite flower. Their cultivation is simple. A mixture of equal parts fibrous loam, manure, and leaf soil, with sufficient sand to keep the whole open, is the best compost. On account of the structure of the roots, ramming the compost ought to be carefully avoided, as they should be somewhat lightly potted at all stages. Good drainage is essential, and attention should be given to watering; they must not be allowed to get dry.

Young plants from stores in Autumn for potting on, 1 6 per doz., 50 for 5 -, 100 for 7, 6. Plants in 3in. pots, from September to end of February, 2 6 doz., 15 - 100; in 5in. pots, from February onwards, 6/-, 9/- and 12/- per doz.

Choicest hybridised and selected seed, 1/6 and 2/6 per packet.

# Camellias.

The Camellia is one of our most popular greenhouse flowers. Either "cut" or "growing," most lovers of flowers admire it.

By careful management a succession of flowers can be obtained from October till late Spring. A liberal supply of water is necessary, but especially during the flowering season; care should be taken to prevent the atmosphere or the roots becoming dry, otherwise the buds may fall off.

Purchasers' Selection, 2/-, 2/6 and 3/6 each, larger 5/- and 7/6 each; our selection of 12 fine varieties for 24/-, 30/-, 36/- and 42/-, according to size; Smaller Plants, one and two years grafted, 1/6 and 2/- each, 15/- and 21/- per doz.

# The CARDENERS' ROYAL BENEVOLENT INSTITUTION.

Secretary-Mr. J. G. INGRAM.

175, VICTORIA STREET, WESTMINSTER, LONDON, W.C.

# The ROYAL CARDENERS' ORPHAN FUND.

Secretary-Mr. B. WYNNE.

30, WELLINGTON STREET, COVENT GARDEN, LONDON, W.C.

We wish to direct the attention of Gardeners and all interested in Horticulture to the splendid work that has been accomplished and is still being carried on by the above bodies.

By subscribing to their funds a gardener is not only making his own position more sure in the future, but at the same time is assisting those who are most in need of help. The respective Secretaries are at all times anxious and willing to give every information concerning the working of their Institutions to all applicants.

#### Cannas. Cladiolus-flowered Varieties.

The spikes resemble Gladioli, and the brilliant colours show grandly against the tropical-like foliage; they bloom continuously during summer. The foliage comprises shades of rich green, glaucous, and chocolate-crimson tints, giving a beautiful tropical aspect to pleasure grounds. When planted in groups on lawns, or in centres of beds—in warm or sheltered situations—they form effective objects during the Summer months; they are also fine for conservatory decoration, and can be kept flowering during the Winter.

Cannas are entirely free from insects and disease. After flowering they may be treated simi-

larly to Gladioli or Dahlia tubers.

During Winter and until March they are supplied as dry tubers; after March, as growing plants.

#### Choice New and Recent Varieties. 1/- each.

No.

- 39 Betsy Ross, beautiful pink, large, wellfilled trusses of bloom; green foliage,
- ack Warrior, rich velvety-maroon, approaching black, large, exceedingly 43 Black free, foliage edged purple.

Seed, choicest mixed, t - per pkt.

# Clibrans' Malmaison Carnations.

THE MOST POPULAR OF ALL CLASSES OF CARNATIONS.

The great popularity of these lovely Carnations illustrates in a remarkable manner the results attendant upon skilful crossing and careful selection for the purpose of raising new varieties. Until a few years ago the number of varieties was limited; in fact, excepting the old blush flowered Souvr. de la Malmaison, many people were unacquainted with Malmaisons. Now, we have a wide choice of colours from pure white to deep crimson, with delightful shades of rose, pink, cerise, salmon, scarlet, &c. All the flowers are of large size with stout petals, many of them possessing a delicions fragrance.

During April and May we can supply Malmaison Carnations in bud and bloom, in variety (our selection), 12/-, 15/- and 18/- per dozen. Young plants in small pots, from October to April, 6/- and 9- per doz.

Write for our special List of Carnations; it contains a full and descriptive list of Malmaisons, together with cultural directions.

Post Free on Application.

#### TO EMPLOYERS REQUIRING HEAD OR UNDER GARDENERS, HEAD OR ASSISTANT FORESTERS, OR FARM BAILIFFS.

We shall be pleased to send our List of Names and Addresses of suitable men, with full particulars of wages required, experience, and references. Great care is taken that no man shall be placed on our Register whose character is not good. Our acquaintance with the men's abilities and characters cannot but be of service to all needing men, as the difficulty of selecting from scores of answers to an advertisement, or from applicants of whom nothing whatever is known, is felt by every employer of labour; frequently it is noticed that preference is given to an inferior man and much better men passed over.

# Tree, or Perpetual Flowering Carnations. English and American Varieties.

The many gloriously beautiful Tree Carnations, embracing white, yellow, pink, cerise, scarlet and deep crimson, with charming intermediate shades, and the remarkable freedom with which they produce their flowers, render them invaluable for greenhouse cultivation, particularly as they bloom during winter, when flowers are so acceptable. As decorative plants or for cutting they are equally useful; for the latter purpose the blooms are always in demand for buttonholes, bonquet making, &c. Many varieties possess a rich fragrance.

Young Plants, our selection of varieties, 4'- and 6'- per dozen; larger, 9'-. Blooming Plants, 12'- and 18'-

Write for our List of Tree Carnations; it contains a full description of our choice and comprehensive collection. Post free on application.

# Celosia—Clibrans' "Gold Medal" Strain.

For Greenhouse and Conservatory decoration the Celosia is very fine; our strain, the result of many years' selection, is famous for brilliancy of colour, size of plume, and good habit. Pale to deepest yellow, red, scarlet, and deep crimson are the prevailing colours. We offer strong plants established in 3 in. pots 3 – per doz., ready in May; later, when potted on, we can supply at 6 – per dozen, and blooming plants 9/- & 12/- per dozen.

Seed, our own strain, red, yellow, or mixed, 1, 6 and 2, 6 per pkt.

# Chrysanthemums.

## GOLD & SILVER MEDALS, CERTIFICATES & AWARDS

Have been accorded to OUR EXHIBITS

#### At the LEADING SHOWS in GREAT BRITAIN.

Chrysanthemums have been a speciality with us for a number of years. The display made during the Autunn, when the plants are in bloom, is one of the remarkable sights in our nurseries, and always enjoyed by numerous visitors who make a point of seeing them yearly. Each season, in addition to the choice new varieties raised by us, we make a selection of the best new varieties from English, Australian, American, and Continental sources, so that our customers may rely upon having the best of the newer varieties, and all the older varieties of tested excellence.

Prices:—Young plants of Japanese, incurved, single, early-flowering and other classes, Our Selection, 2/6 doz.; 18/- per 100.

Rarer or newer varieties, 4/- to 9/- per doz.

From April onwards, plants in 5-inch pots, 5/-, 6/- and 9/- doz.

From June, plants in blooming pots, 12/-, 15/-, 18/- and 24/- doz.

Our General List of Chrysanthemums is published on Nov. 1st each year, and the List of Novelties on January 1st. We shall be pleased to send copies of both these Lists, post free on application.

The Journal of Horticulture.---It is questionable if any finer Roses in pots than those at Messrs. Clibrans are to be found in the kingdom. The large plants of the climbing varieties are superb, grown in 7in. pots, with three or four strong, well-matured growths, 8ft. to 12ft. in length, and representing all the choicer varieties, they are models of excellence, and represent the ideal in climbing Roses. Dorothy Perkins, the beautiful shell-pink Rambler, was represented by a splendid batch, and, as I can well understand, Messrs. Clibrans have found a large demand for this lovely variety. Other Roses of non-climbing character were to be seen as strong, sturdy, well-ripened bushes, trained to four stakes, in 7in. pots. At the time of our visit Messrs. Clibrans must have had on hand close npon 10,000 Roses in pots, of various classes and sizes. A fine batch of the beautiful Cupressus functoris was also noted in one of the cool houses and for decorative purposes this plant deserves much greater popularity. Ferns and palms in various sizes were to be seen in thousands.

In other houses were noted representative batches of *Eupatorium petiolare*, winter-flowering Begonias, *Malmaison* and Winter-flowering Carnations, together with hosts of other subjects too numerous to mention.

# Clibrans' "Gold Medal" Cinerarias.

Many awards have been made to our Strain at various shows.

We consider after many years' rigid selection we have a strain of these lovely plants unsur-ed by any in existence. The plants are characterised by a dwarf, vigorous, robust growth, they passed by any in existence. bloom with the greatest profusion, and the flowers are of large size, with individual petals of stout

substance. The colours are very rich and as varied as can be found in the family.

Perhaps no plants make such a splendid display in the greenhouse and conservatory in the carly part of the year as Cinerarias. They are easily cultivated if grown in a rather damp and cool place, taking special care to keep them free from insect pests, which can easily be done by fumiga-

Ex. Country Life:—"They displayed a remarkable colouring, some pure selfs, rose, purple (almost black, so deep was the shade), crimson, white, and white with crimson tips to the florets, while some have half of the florets covered with purple, rose, or other good shade. A delightful strain because the colours are fresh and decided."

Ex. Gardeners' Magazine:—" This strain is remarkable for its robust habit as well as for its pure form and rich clear colonrs of the flowers produced. They represent pure white, white and blue, white and purple, pale blue, mauve, dark blue, red, and crimson shades, the self-colours being especially rich and effective."

Ex. Gardeners' Chronicle:—" This strain has much merit, and will produce a gorgeous display of colour in a conservatory in April. The colours are particularly good."

Ex. The Garden:—" The flowers show how carefully the strain has been brought to its present perfection. They are not absurdly large, but pure and fresh. A rich and varied assortment that must provide a feast of colour to the eyc."

Scedling Cinerarias from stores, from July to October, for potting on, 12 for 1/6, 50 for 5/-, 100 for 7/6; in 3in. pots, from September to end of November, 2/6 per dozen, 15/- per 100. Fine plants in 5in. pots for blooming in the Spring, 6/-, 9/- and 12/- per doz.

Cineraria Seed, Clibrans' "Gold Medal" strain, 1/6 and 2/6 per pkt.

#### "Gold Medal" Cineraria Stellata.

A quite distinct class of these lovely plants; of tall habit, with large heads of small starshaped flowers in a variety of colours; vigorous in growth and profuse in bloom.

Prices same as the large flowcred class. See above.

Seed, saved from specially selected flowers, 1/6 and 2/6 per pkt.

# Coleus.

Highly ornamental soft-wooded plants for Conservatory decoration. The chief requisite in their cultivation in Spring is warmth. If they can be accommodated in a warm frame or stove in March, April, or May, they will do well in Conservatory or Greenhouse for the remainder of the Summer, and their foliage and diversified colouring contrasts well with other plants. A compost of turfy loam, leaf-mould, manure, and sand is suitable.

Purchasers' Selection, 4d. each, 3/- doz., excepting those priced; Our Selection, 2/6 per doz. Cuttings, two-thirds that of plants.

Large Plants in 41 and 5 inch pots, 5/-, 6 - and 9 - per doz.

No.

- r Adrien Schmitt, spotted red, yellow, green and brown.
- 4 Attraction, green, blotched rose, leaves deeply cut.
- 11 Crimson Gem, rich crimson red, a striking and effective broad-leaved variety. 6d.
- 15 Edith Sentance, bright crimson, banded blackish-purple.
- 23 Golden Gem, a beautiful rich golden broadleaved variety. 6d.
- 26 Hart's Conqueror, dark chocolate-maroon, rosy-red centre, blotched cream,
- 30 Hatherton Beauty, centre rich maroon, shading to bright purple and edged creamy-white.
- 42 Miss Rosina, light green, mottled yellow, blotched crimson.
- 53 Mrs. Potter, rich creamy-yellow, margin green.

No.

- 70 Mrs. R. H. May, golden green ground, heavily splashed and marked purplish
- 57 Mrs. Sander, green, ivory band up centre, splashed chestnut-maroon and yellow.
- 60 Mrs. Skinner, light green, mottled deep maroon, veined bright rosy purple, and flaked creamy-white.
- s. Toliworthy, gold, splashed crimson. 6d. 62 Mrs. spotted
- 65 Oldfleid Gem, creamy-white, flaked ruby-
- pnrple, sharp-pointed leaves.
  71 Thyrsoldeus (F.C.C., R.H.S.), blue, in numerous long racemes. Grown in an intermediate or warm greenhouse it makes a splendid display in winter.
- 74 Triomphe de Luxembourg, exquisitely coloured in a variety of shades.
- 79 Verschaffeitil, rich crimson, fine for bed-
- ding, 2/6 per doz.; 15/- per 100.

  89 Winnie Bazeley, golden, shaded green and delicately mottled maroon.

Seed, saved from finest varieties, specially selected, pcr pkt. 1/- & 1/6.

ONE OF OUR HOUSES OF CYCLAMEN.

[From a Photograph.

# Cyclamen Persicum (Giganteum Strain).

Awarded "Cold Medals" at several shows.

Our strain of this beautiful plant is unsurpassed. The flowers are enormous, borne well above the foliage, and of the brightest shades of colour. For profuseness of bloom, combined with robust growth, this strain is unrivalled. Few plants are better adapted for Winter and Spring decoration.

Plants in 3in. pots, from April to end of June, 2-6 per dozen, 18, - per 100; larger plants in 5in. pots, 6 - and 9 - per dozen, 40 - and 60 - per 100.

In Autumn and Winter plants in bud and bloom, very fine, 12/-, 18/- and 24 - per dozen; 90/- and upwards per 100.

Young plants from boxes from December to March, 1 6 doz., 10/- per 100.

Seed saved from the finest selected flowers of our " Gold Medal " strain, hand fertilised, per pkt. 1–6 and 2–6,  $^{\circ}$ 

# Epiphyllums.

A fine class of Winter-blooming Stove or warm Greenhouse Plants, for table and conservatory decoration. The beautiful form and brilliant colours of the flowers, freedom of blooming, and easy culture, make them desirable decorative plants. The flowers are produced at the ends of the singularly-formed leaves. They are best grown as standards, as the stem is then encircled with the pretty drooping flowers, and the effect much enhanced.

Purchasers' Selection, 1 - and 1 6 each, 12 - and 15 - per doz., according to size; our selection, 9 - and 12 - per dozen.

#### No.

- 1 Makoyanum, bright red, vigorous.
- 3 Russellianum Gaertnerl, bright scarlet, free.
- Truncatum aurantlacum, orange, red and purple.
- 14 coccineum, rich deep scarlet.
- 18 —— E. Madlain, orange-red. light centre; one of the best.
- 31 Mr. Belle, scarlet and white, pretty and distinct.
- 21 -- la Vesuve, bright scarlet.

#### No.

- 22 Truncatum magnificum, large white, tipped rose.
- 25 Mons. E. Andre, bright purplish-rose. 28 — Mons. Fournier, crimson-scarlet, lighter centre.
- 40 Ruckerianum pallidum, light purple and violet.
- 37 —— roseum amabile, white, edged rose. 44 —— salmonium flavum, salmon-yellow.
- 49 -- violaceum purpureum, violet-purple

# Ferns.

These are indispensable decorative plants, and their usefulness to contrast with flowering plants is well known, their popularity is ever increasing. For Stove and Greenhouse or table and room decoration they are of great value, their elegant and graceful habit giving a pleasing effect. They are also invaluable for margin of paths, under stages, or corners, where frequently other plants have failed.

#### Greenhouse Varieties.

Our Selection, twelve Ferns for Greenhouse, 4/-, 6/- and 9/-, Fifty Greenhouse Ferns, in variety, for 25'- or 35'-; 100 for 40'- or 60'-

Small Seedling Ferns for Planting Rockwork, or for potting in Fancy pots for Table Decoration, &c.
Our selection, 2/- per dozen upwards, 12 - per 100.

Most of the varieties in this section also do well under Stove culture.

# Japanese Fern Balls ("Davallia Bullata.")

These are pretty novelties in Ferns from Japan. The balls or designs should be immersed a few hours in tepid water, and then hung up in the Greenhouse. They require to be soaked once or twice a week, and in a short time produce a mass of fronds that cover their entire surface.

We can supply balls or rings in a dry state without fronds, 1/-, 1/6 and 2/- each. Other designs can be supplied at various prices.

The Gardens, Thorndale.

The Cinerarias have been remarkably fine both as to size of bloom and quantity. Some of the plants sent out side shoots from the base, which not only prolonged the flowering period but also made the plants one mass of bloom. I have now got the Calceolarias just coming in, and for richness of colour and size of bloom I should think they are unequalled, many of the blooms measuring 2½in, across. I searcely think it possible for you to effect any further improvements in your various strains.

N. J. WILLIAMS.

Figs (see page 61).

# Fuchsias.

Owing to their easy culture and beautiful flowers are favourites generally. Easy to grow, beautiful when in bloom, the Fuchsia is a valuable decorative plant. A temperature of about 60% with a rise by sun heat, is suitable, a good supply of water should be given, with a syringing in the morning and afternoon. Plenty of air and a light shading are necessary in Summer, particularly when flowering. They succeed well in a mixture of two parts loam and one of good manure, well mixed and used in a lumpy state.

#### General Collection.

Prices refer to young plants in 21in. pots; for larger plants higher prices are charged.

Purchasers' selection, excepting those priced, 4d. each; 3/- per dozen. Our selection, 2/6 per dozen, 15/- per 100. Cuttings two-thirds that of plants.

- \*357 Cactus Rival, deep cerise, striking.
- \*157 Herbert Greenhlll, pale blush-pink.
- \*187 J. R. Greenhlll, slightly darker in colour than the preceding.

Ex. Journal of Horticulture, Jan. 5th, 1905.—As usual, there were abundance of subjects worthy of reference. In the department devoted to the propagation of the rarer and choicer worthy of reference. In the department devoted to the propagation of the rarer and choicer trees, shrubs and climbers were large stocks of the new Jasminum primulinum, for which Messrs. Clibrans have a brisk demand. Plants in pots of the silver-leaved tree—Leucadendron argenteum—were interesting; unfortunately, this very beautiful plant does not lend itself well to cultivation. Fremontia californica the lovely and comparatively rare Hamamelis mollis and Romneya Coulteri, were well represented; of the latter there was an exceptionally fine batch in perfect health. Other interesting items were Buddleia Colvillei and B. pariabilis. Embathyium coccineum Encryphia pinnaticalia, Hydrogram masserianum and B. variabilis, Embothrium coccineum, Eucryphia pinnatifolia, Hypericum moserianum, tri-colour, and the giant Honeysuchle, Lonicera Hildebrandti, in addition to large numbers of commoner and more widely-known plants.

# Single Geraniums—Zonal and Nosegay.

These arc of utmost value for Conservatory decoration during the Summer and Autumn, and if properly grown, furnish gorgeous flowers in Winter, and none can fail to appreciate them for decorative purposes from October to January, a season when (excepting Chrysanthemums) there are no plants of easy culture to furnish flowers. Considering their low price, their simple cultural requirements, freedom from insect enemies, and yet strikingly gorgeous appearance and usefulness for cut flowers, as Winter blooming plants they are indispensable. Lovers of Geraniums are delighted with our house of blooming plants. Inspection invited.

Plants intended for Winter decoration ought to be grown on during the Summer for that purpose alone. They ought not to be allowed to waste their strength in blooming in Summer or early Autumn. All the buds should be removed, the plants grown in pots out of doors, carefully attended to for water, and the wood ripened in August or September; then remove to a cool, airy house, and

a few weeks before bloom is wanted place them in a temperature of 50 to 60 degrees.

#### Choice New and Recent Varieties.

973 Rose Queen, soft rose-pink, good habit.

977 Souvenir de Charles Turner, rose, shaded violet-amaranth.

979 The Blush, blush-white, the best white.

F.x. Gardener's Chronicle.—" Greenhouse climbers appear to be given much attention, and the collection is very extensive. There was a large stock of young plants of Acacia pubescens, which trade propagators will recognise as a most difficult plant to increase. There were plenty of good Camellias, and in the stoves a nice collection of ornamental foliage plants, as well as of those that are cultivated for their flowers. Ixoras and Clerodendron fallax were good, and the stock of Codiæums (Crotons) was well cultivated and possessed good colour. Dracæna Doucettii was represented by two or three dozen excellent plants in 7in. pots."

# Scented-leaved Geraniums.

Purchasers' selection, 6d. each. Six distinct varieties, our selection, for 3 -

982 Blandfordianum, white, feathered ma-

985 citriodorum crispum, citron-scented.

987 Clorinda, beautiful pink, oak-leaved, very sweet.

989 denticulata major, rich citron perfume; prettily-cut foliage.

No.

901 Fair Ellen, oak-leaved, very fragrant.

Fair Rosamond, oak-leaved, charming. 993 998 Lady Plymouth, pretty variegated foliage

1006 Prince of Orange, delicions orange fragrance,

1009 Scarlet Unique, dark scarlet, blotched maroon, excellent for walls.

# Gloxinias—Erect Flowering Varieties.

Gloxinias are extremely beautiful. By successive potting they flower throughout the greater part of the year, thriving best in a compost of loam, peat, leaf-mould, and sand, and a moist, warm atmosphere, free from cold draughts. Start the bulbs in March and April, in a warm house, and apply weak, liquid manure, once or twice a week, when growing freely. Shade from sunshine. After blooming gradually withhold water, and store away in a dry moderately-warm place, care being taken that no damp reaches the bulbs.

#### Purchasers' selection, 9d. each, 7 6 doz.; excepting those priced.

Our selection of 12 fine varieties, 6 - Mixed Seedlings, unbloomed, 5 - per dozen.

Seed saved from our own collection, 1 6 and 2 6 per pkt.

Plants in bud or bloom, 12 - and 18 - doz.

No.

- Baden-Powell, spotted flower of great substance.
- Beacon, rich velvety crimson-scarlet; handsome.
- Countess of Warwick, lobes rose-pink, 13 white throat, remarkably free.
- Earl of Beaconsfield, ruby-violet and heliotrope.
- Emperor Frederick, fiery scarlet, margined pure white.
- Ethel, white throat, light-rose lobes, edged dark crimson.
- Exquisite, sulphur throat spotted pink, lobes suffused pink.
- General Gordon, pale spotted throat. lobes densely spotted pink.

  Goliath, purple, shaded manye, lighter
- margin.
- Helen, soft rose, spotted, distinct.
- 48 Marguerite, white throat, lobes pale lilac; Jarge.

No.

- 52 Monarch, bright crimson-scarlet, shaded maroon-crimson.
- 56 Mr. J. A. Dorsett, maroon-crimson, shaded purple, throat margined white and carmine.
- 61 Mrs. Huntley, crimson purple margined white; throat pure white.
- 62 Mrs. Idris, white, spotted purplish rose; erect.
- 69 Mrs. Skinner, purple-maroon edged lilac; white throat
- 71 Mrs. Towler, fine spotted form.
- 72 Oldfield Crimson, large glowing crimson.
- 70 Oldfield White, pure white, great substance.
- 86 **Sidonie,** dark velvety purple, margined light blue, throat white, spotted white, spotted purple; beautiful
- 80 Victoria Regina, superb crimson, pale rose

# Our Tree and Shrub List.

Previously we have included in this list Roses. Fruit Trees, Forest Trees, Hedge and Covert Plants. We have now sub-divided the List into four distinct issues, to make it more convenient to handle and to further specialise the departments as follows :—

**ROSES.**—In pots and in open ground.

FRUITS.—Fruit Trees and Bushes of all descriptions, including Grape Vines, Figs, and miscellaneous edible roots.

FOREST TREES, HEDGE AND COVERT PLANTS.—A comprehensive List detailing sizes and prices of every class of these subjects, together with a mass of information of value to the Forester and all who have the handling or planting of this class of Tree or Shrub.

ORNAMENTAL TREES AND SHRUBS .-- Comprises a complete List of these classes, and includes Hardy Climbers, Rhododendrons, American Plants, Forcing Plants, and an abridged List of Sundries, Requisites, &c.

All the above are sent gratis and post free on application.

All are issued in a convenient size for pocket use.

# Greenhouse Plants.

CULTURAL NOTES.—Plants suitable for Greenhouses, thrive best in a temperature of 40 to 50 degrees in Winter. All the Soft-wooded Plants of this Section need supplies of weak liquid manure, or a top-dressing of artificial mannre, such as our "Ideal" Fertilizer, as soon as they are well established in the pots, if free and continuous bloom is required. The Hard-wooded Plants mostly require peat, leaf-soil, and sand, with a little well-rotted old manure, and do best in the coldest and most airy part of the house. The Soft-wooded Plants require rotted turf, old manure, leaf-mould, and sand, and do best in the warmest part of the house. If either class is wanted for Winter bloom 10 to 15 degrees more heat is required than is needed to keep them in health without bloom, and a drier atmosphere is essential. From June to September Hard-wooded Plants do well in a cold frame or behind a north wall or fence, if attended to for water, and kept quite free from insects. Soft-wooded Plants at this time are mostly in bloom. The house should be well ventilated, and slightly shaded from strong sunshine. Fumigate or syringe with some insecticide before the insects appear. We recommend Campbell's Fumigating Insecticide and Lemon Oil Liquid Insecticide for this purpose. (See Index).

## New and Choice Greenhouse Plants.

NICOTIANA SANDERÆ.

Asparagus Myriocladus, beautiful non-climbing species, with deep green leaves; whilst preserving the graceful character of Asparagus this is closer and more dense, for basket, pot, or decorative work it is unsurpassed. 1/6 and 2/6.

Azalea Hexe, deep rich red flowers, free; its habit and constitution will undoubtedly make it very popular. 11- and 1/6.

Eupatorium petiolare, a beantiful decorative plant, rich green foliage, and large branching heads of flowers of a charming blush shade, passing with age to white; sweetly scented, and very lasting, 6d, and 9d

Eupatorium vernale, the largest flowered of the Eupatoriums, dark bronzy-green foliage; flowers tinged with pink when first opened, pure white when mature; in branching corymbs 8in. to 10in. in diameter; they open early in the year, and remain in beauty for weeks. 9d. and 1/-

Kalanchoe feithamensis, F.C.C., R.H.S., intense scarlet. Bronzy-green foliage; flowers in branching corymbs, last a long time on the plant or when cut. 9d & 1/-

Lindenbergia Grandiflora, Salvia-like flowers of a bright yellow colour, an excellent decorative subject, flowering freely when quite small; useful for cutting as when placed in water the flowers retain their freshness for a considerable period. 6d. and od.

Lobelia Tenuior, a beautiful Lobelia, exceedingly well adapted for a pot or basket plant; produces a multitude of flowers, of a lovely cobalt blue, with a white eye. ad, and 6d.

Moschosma riparium, blush white flowers, in light elegant spikes, rich green foliage, popular as a Winter flowering greenhouse plant. 6d. and 9d.

Nicotiana Sanderæ (New Hybrids), Gold Medal and F.C.C., R.H.S., and Gold Medal, Paris, (see illustration). Most heautiful of all the Nicotianas. These new hybrids produce flowers covering a wide range of colonrs, pure white, pink, light red, dark red, purple, crimson, violet and salmon with the ntmost profusion; of strong vigorous branching habit, and clothed from base to snmmit with flowers; exceptionally hardy and of strong constitution, admirably adapted for the Greenhouse, Conservatory, or decorative use generally, 3d., 6d. and 9d. each.

Primula Kewensis, F.C.C., R.H.S., flower stems numerous, 10in. to 18in. high, flowers in whorls at intervals of 2in. or 3in. along their entire length. Each whorl has eight to 12 bright yellow flowers, very fragrant; an excellent plant for Winternse, also for cutting. 9d. and 1/-

Rehmannia angulata, A.M., R.H.S., flowers 3in. diameter, similar shape to those of Inearvillea Delavayi, rose-purple colour, yellow throat spotted deep purple; free and continuous. 9d. and 1/-

#### Greenhouse Plants-continue 1.

#### General Collection.

Twelve Fine Varieties of Greenhouse Plants, 6 -, 9 -, 12 - to 18, -

ACACIA, the so-called Miniosas; require firm potting, abundance of water in Summer, and severe pruning soon after flowering.

affinis, feathery foliage, yellow flower. 9d. and 1/-

-armata, globular lemon-colonred flower heads. 6d., 9d. and 1/-

cordata, creamy-white in groups of four from every "leaf." 1/dealbata, feathery foliage, underside white. 9d. and 1/-

Drummondii, flower heads lemon. 1/- to 1/6.

-grandis, bright yellow. 1/- to 1/6. - longifolia magnifica, large globular yellow flower heads. 1/- and 1/6.

- platyptera, large yellow flowers in mid-Winter. 1/- to 1/6.

pubescens, lovely foliage, profuse bloomer, yellow flower, in long handsome spikes; one of the best. 1/6 to 2/6.

- Riccana, profusion of globular pale

lemon flowers. 1 - and 1/6.

- verticilata, yellow in loose spikes, in March. 1/- and 1/6.

AGAPANTHUS umbellatus, the African Lily, bright blue, rich compost, and abundance of water in the growing and flowering season, and rest during the Winter. 1/- and 1/6.

-albus, pure white. 1/- and 1/6. fl. pl., double blue, distinct. 1/and 1/6.

-variegatus, foliage striped white. 1/- and 1/6.

Agathæa cœlestis, blue Marguerite-like flowers, 4d. and 6d. each; 3/6 per dozen.

ALBERTA magna, panicles of bright red, succeeded by beautiful fruit. 1/- and

ALOYSIA citriodora. Lemon-scented bena; prune severely in the Spring. 4d. and 6d.

Standard plants on 18in. to 24in, stems, with nice heads, 2/6 and 3/6 each.

AOTUS gracillima, long graceful spikes of closely set yellow and crimson pea-like flowers in early Summer. 1/6.

ARALIA Sieboldii (Fatsia Japonica), large handsome glossy foliage. Fine room plants, 4d. and 6d.

- fol. var., broadly splashed with m. 1/6. cream.

- Moserii, an improved form of closer and more compact habit. 6d.

ARAUCARIA excelsa, the beautiful Norfolk Island Pine; splendidly decorative for rooms. 1/6, 2/- and 2/6.

ARDISIA crenulata, produces a number of bright red berries during the winter. 6d., 9d., 1/- to 1/6.

ARUM sanctum, the Black Calla, rich velvety black-purple, distinct. od. and 1./-

white. 1/6, 2, 6 to 3, 6.

AZALEA amœna, bright rosy-purple. 1/and 1/6.

—— Caldwellii, larger and brighter than preceding. 1/- and 1/6.
—— Duke of Connaught, semi-domble

bright reddish crimson, fine for forcing. 1/- to 1/6.

- Emblem, magenta-crimson, bright spots. 1/- to 1/6.

Mrs. Gerard Leigh, bright rosyscarlet. 1/- to 1/6.
- Hexe. See New Greenhouse Plants,

page 28.

Indica, in variety, best sorts, 2, -, 2/6 to 3/6.

BEAUFORTIA Sparsa, bright scarlet, attractive. 1/- and 1/6.

BEGONIAS, tuberous. See pages 4 to 7.

BORONIA, elegant Spring flowering plants, small shallow cup-shaped flowers; of easy culture; the strong growers require frequent pinching; beautifully fragrant.

- elatior, rosy-carmine, fragrant. 1 -, 1 6 to 2/6.

heterophylla, dark rose, graceful. 1 -, 1/6 to 2/6.

megastigma, maroon-purple, mustardyellow inside; fragrant. 1/-, 1/6 to 2/6.

BRUGMANSIA, large trumpet-shaped flowers, bearing severe pruning well.

arborea, white, 8in. long. 1/6 to 2/6. coccinea, large brick-red flowers. 1/6 to

- Knightii, double white, does well in sheltered positions outside in Summer. 1 6 to 2/6.

CACTI. Choice and distinct sorts, our selection. 6/-, 9 - and 12/- per dozen.

CALCEOLARIAS (herbaceous). See page t1.

CALLA. See Richardia page 32,

CALLIANDRA Tweedei, elegant tufts of rich crimson.  $1 \rightarrow 1/6$  and 2/6.

CAMPANULA pyramidalis, large handsome blue flowers. 6d. and 9d.

alba, the white form. 6d. and 9d. isophylla, flowers 2 in, across, salver shaped, lilac-blue with grey centre; excellent for hanging baskets for windows.

- — alba, pure white, very free. od. - — Balchiniana, broad creamy-white margined leaves, having a green centre;

CAREX japonica variegata elegantissima, leaves beautifully margined white; showy and elegant. 9d, and 1.

CASSIA corymbosa, yellow pea-shaped flowers. 1 /-- and 1 /6.

CELOSIA pyramidalis. See page 14.

#### Greenhouse Plants-continued.

- CHIRONIA ixifera, charming rosy-pink; ornamental. I = and I = 6.
- CHOISYA ternata, the Mexican Orange Flower, a handsome almost hardy evergreen, deliciously scented white flowers, 6d., 9d. to 1/-
- CHOROZEMA, graceful spikes of brilliant pea-like flowers of unusual colour.

cordata splendens, tawny orange, yellow

eve ringed carmine-rose.

- Lowii, dark green foliage; flowers darker and larger than cordata; in bloom continnously for many months; one of the most beautiful trellis plants. 1/6 to 2/6.
- CINERARIAS. See page 15.
- CITRUS japonica, Kumqua! or Chinese Orange, a free bearing species, brightly coloured fruits. 1 6 to 2 '6.
- St. Michael's, the ordinary orange of commerce, large and prolific when quite small. 1 6 to 2 6.
- Tangerine, delightfully perfumed little orange. Abundant bearer. 1 6 to 2 6.

- STATICE, blue flowers, which retain their colour and form for many months.

Butcheril, a strong free grower. 1/6

- Holfordii, broad leaved and vigorous. 1/6 and 2/6.

profusa, of more hranching and shrubby habit. 2/6.

STREPTOCARPUS, choice hybrid seedlings. See page 52.

STREPTOSOLEN Jamesonll, bright showy trusses of pretty flowers from May to August. 9d. to 1/-

SUCCULENTS. See page 53.

TREMANDRA verticillata, rich blue pendulous flowers with purple spots; continuous bloomer of simple culture. 1/6 to 2/6.

VALLOTA purpurea, Scarborough Lily, umbels of rich scarlet flowers. 1/- to 1/6.

VERBENA. See page 54.

YUCCA aloifolia, fol. var. 2/6 and 3/6.
—— filamentosa variegata. 2/6 and 3/6. Hardy Yuccas, see Herbaceous Plants List.

#### Yellow-flowered Callas.

ELLIOTTIANA, spathes intensely rich gold, foliage green, spotted white, a first-class greenhouse plant. One-year-old bulbs, 6d. each; two-year-old bulbs, 9d. and 1/- each; flowering bulbs 2/6 to 3/6 each.

PENTLANDII, spathe bright golden-yellow, with a blotch of crimson at the base. One-year-old bulbs, 6/- doz.; two-year-old bulbs, 1/-; flowering bulbs, 2/6 and 3/6 each.

- Taylorl, handsome hybrid Calla, leaves spotted silver, primrose flowers. plants, 1/6; flowering size, 3/6.

# Greenhouse Climbers.

## New Species and Varieties.

Clianthus puniceus fl. albus, pure white, blooms with the utmost freedom. 1/and 1/6.

Rubus Moluccanus, prettily-foliaged climber, stems covered with rich velvety-brown tomentum, leaves greenish-grey with a silvery sheen, pretty, and distinct from any other climbing plant. 1/- and 1/6.

Mysiphyllum asparagoides myrtifolia (A.M., R.H.S.), a beautiful sport from the well-known Smilax, leaves of but one quarter the size and borne on long feathery trails often 6ft. to 8ft. in length; when cut the trails remain fresh for several days; for decorative use on tables, for baskets, show bouquets, or wherever a light, graceful effect is required this is indispensable, 1/6.

#### Greenhouse Climbers-continued.

#### General Collection.

- ASPARAGUS.—See Stove Climbers, page 51.
  All Asparagus are also well adapted for Greenhouse Culture.
- BERBERIDOPSIS corallina, fragrant climber, bright pendulous globular coralred flowers in clusters. 1/- and 1/6.
- BIGNONIA (Tecoma), graceful climbers, showy trumpet flowers; like a firm root ruu in a sunny position.
- -Chamberlaynil, yellow, in racemes from the axils of the bright green foliage. 1/6 - cherere, orange flowers of great beauty.

- magnifica, purple-crimson, light primrose throat. 1/6.
- Regalis, yellow and red; large flower of great beauty; a handsome climber. 1/6. - Tweedlana, shining yellow. 176.
- venusta, brilliant orange-crimson.
- BOUGAINVILLEA glabra Sanderiana, rich violet-red, free, small plants being cov-ered. 1/6 to 2/6.

For other varieties, see Stove Plants, page 51.

CALAMPELIS scabra (Eccremocarpus), graceful rambling shoots, many-flowered sprays of bright orange-red, light soil; grand for walls, pillars, and trellis. to 1/6.

CAMPANULA Isophylla and vars., see page 29.

CLEMATIS, likes liberal treatment and

plenty of liquid mannre.

- coccinea, bell-shaped flowers, yellow bright crimson without. 1/and 1/6.

- indivisa, loose trusses of creamy white.

1/-, 1/6 to 2/6.

- lobata, similar to the type, but with lobed leaflets. 1/-, 1/6 to 2/6.
- CLIANTHUS magnificus, the Great Glory Pea, a climber of extraordinary beauty, freely-produced bright crimson-scarlet flowers, over 2in, long, with boat-shaped keel and long-pointed beak. 1/6 to
- puniceus fl. albus. See New Greenhouse Climbers, page 33.
- COBÆA scandens, rapid grower, large bell-shaped flowers, dark-purple from late Spring until Autumn. Fairly rich light soil and abundant water during growth. 9d. and 1/-

- fol. var., richly margined creamy-sulphur. 1/6 to 2/6.

- CONVOLVULUS mauritanicus, a beantiful twining bind weed, pale blue, white throat. 6d. and 9d.
- FICUS radicans fol. aur. var., prettily variegated yellow foliage. F.C.C. R.H.S. 1/- and 1/6.

- varlegata, leaves green and creamy white. 1/-, 1/6 and 2/6.

- repens, small roundish leaves clinging to walls like ivy, making a complete cover. 6d. and 9d.; 4/6 and 6/- doz.

--- mlnlma, a graceful, very small-leaved form. 6d. and 9d. each; 4/6 and 6/- per dozen.

- FICUS repens variegata, variegated foliaged variety; makes a charming companion to preceding. 9d. and 1/- each.
- HABROTHAMNUS aurantiacus. See Greenlionse Plants, page 31. - elegans. See Greenhouse Plants, page 31.
- HIDALGOA Wercklei, "Climbing Dahlia," a free-blooming climber; flowers brilliant scarlet, graceful. od. and 1/-
- JASMINUM, with deliciously perflowers, likes peat in the compost. perfumed
- grandiflorum, sweet white flowers reddish beneath. June to October. 1/and 1/6.
- gracillimum, Winter bloomer, white sweet-scented, in clusters, good for pots and baskets. 1/- and 1/6.
- hirsutum (syn. pubescens), large white flowers in trusses. 1/- and 1/6.
- KENNEDYA monophylla lilacina, lilac flowers. Excellent for training over trellis or pillars of a roof. Likes firm potting and partial shade. 1/- and 1/6.

ovata, fine purple-blue flowers. 1/and 1/6.

- LAPAGERIA, particularly effective over a greenhouse roof. Wreaths of lovely waxen bell-shaped flowers, lasting well when cut. Require abundant drainage, plenty of water during growth, and frequent syringings till the flowers open.

  — alba, pure white form. 1/6, 2/6 to 3/6.
- rosea, flowers rosy-crimson. 1/-, 1/6 to
- - 2/6 to 3/6.

LONICERA, Honeysuckle.

- -glgantea, many-flowered trusses of rich yellow. 1/6.
- semperflorens minor, scarlet tubular flowers; valuable for greenhouse rafters. 1/- to 1/6.
- LOPHOSPERMUM scandens, lovely purpleviolet trumpet flowers. 9d. and 1/-
- MANDEVILLEA suaveolens, large, pure white, sweet-scented funnel-shaped flowers. 1/6 and 2/6.
- MAURANDYA Barclayana, beautiful Mimulusshaped flowers, violet-purple, creamy-green tube. 1/- and 1/6.
- MITRARIA Coccinea, bright scarlet flowers on slender stems; grow in cool shady part of house on peaty soil with plenty of sand. 1/- and 1/6.
- MYRSIPHYLLUM asparagoides, so-called Smilax; glossy green leaves and dainty trails; favourite for bouquets, &c. 6d. and 9d.
- myrtifolia. See New Climbing Plants, page 33.
- PASSIFLORA, Passion Flower, easily-grown climbers; if planted out should be restricted in root room.
- Arc-en-clel, lovely violet-blue. 9d., 1/to 1/6.

#### Greenhouse Climbers—General Collection—continued.

PASSIFLORA cœrulea, the common blue Passion Flower; almost hardy. 9d., 1/- to 1/6.

- Constance Elliott, pure ivory-white, sweet-scented. 9d., 1/- to 1/6.
- edulis, Robert's var., the Edible Fruited

Passion Flower, white tinged purple; fragrant; produces enormous crops of fine luscious fruit in an ordinary vinery. Plants of best variety. 1/- aud 1/6.

- Eynsford Gem, purple red, shaded rose. 9d., 1/- and 1/6.

- Watsoniana, exquisitely perfumed flowers, sepals white, petals lilac. 1/- and 1/6. For other Passifloras see Stove Climbers.

PLUMBAGO capensis, pale blue. 6d., 9d., 1/- and 1/6.

———aiba, beautiful white form. 6d.,

9d., 1/- to 1/6.

RHODOCHITON volubile, weil-shaped red-dish calyx, and dark purple-red funnelshaped corolla; free, 9d. and 1/-

RHYNCHOSPERMUM jasminoides, clustered very fragrant. 1/- and 1/6.

moiuccanus. See New Climbing RUBUS Plants, page 33.

SMILAX. See Myrsiphyllum.

SOLANUM jasminoides, bluish-white in graceful sprays. 9d., 1/- to 1/6.

SOLANUM Wendlandii, lilac-blue flowers nearly 3 in. across. 1/6 to 2/6. For other Solanums see Stove Climbers.

SOLLYA Drummondil, tiny but lovely clear turquoise-blue flowers; peaty soil. 1/- and 1/6.

SWAINSONIA, beautiful spikes of pea-like flowers; sandy loam and peat.

galegifolia, deep red, 9d., 1/- to 1/6. -alba, pure white, fine. 9d., 1/to 1/6.

TACSONIA, ailied to the Passion Flower, of easy growth.
- exoniensis, bright rose, over 5 in. across.

1/- to 1/6.

- Smytheana, brilliant reddish-salmon or orange-scarlet. 1/6 to 2/6.

- Van Voixemi, scarlet, of singular beauty, often 5 in. across; one of the best. 1/-, 1/6 to 2/6.

OMA (Bignonia) jasminoides, white, streaked red. 1/- to 1/6.

aiba magna, large white. 1/6 to 2/6. THUNBERGIA aiata aiba, showy

flowers with a long tube. 9d. and 1/-. aurantiaca, lovely orange, large black disc in centre; 9d. and 1/-

For other Thunbergias, see Stove Climbers, page 52.

#### COLLECTION OF GREENHOUSE CLIMBERS.

Our selection, six in 6 beautiful distinct sorts, 5/-, 7/6, 10/6 and 15/-, ,, ,, twelve in 12 beautiful distinct sorts, 9/-, 12/-, 18/- and 30/-

# Heliotropium—Heliotrope.

A well-known useful subject for the Greenhouse or Conservatory. Deliciously fragrant for cutting. As a bedding plant is also useful.

Purchasers' selection, 4d. each, 3/- per doz., excepting those priced. Our selection, 2/6 per dozen. No.

11 Bouquet Perfume, lilac-blue; fragrant.

19 Collyris, deep violet, clear white eye, good for pots or bedding.

25 Comte Horace de Choiseul, large flowers, white centre, bordered rosy-heliotrope;

33 Dr. Jeulin, large trusses of violet flowers. (A.M., R.H.S.)

36 giganteum, bluish-lilac, light eye, deliciously perfumed.

39 grandiflorum pienum, double violet-rose, white centre.

46 Jean d'Arc, white, in large heads; charm-

ing.

50 Lord Roberts, large heads of lovely metallic violet fragrant flowers a grand variety.

- 57 Madame Daurel, immense truss, intense violet-blue.
- 60 Madame de Bussy, blue, white centre.
- 63 Madame Emma Brouiliet, dark reddishviolet.
- 74 Mastodonte, mauve-blue, white eye.
- 79 Mrs. Lewington, immense truss; dark,
- 86 Piccioia, violet-rose.
- 89 President Garfield, bright mauve-purple.
- 04 Queen Eiena of Italy, large heads, most pleasing shade. 9d.
- 97 White Lady, pure white; free.

Standard Plants.—We can supply a few of the above varieties, grown as standards, with 18 in. to 24 in. stems and nice heads. 2/6 and 3/6 each.

Seed, mixed, saved from finest named varieties. Per packet, 6d.

#### YORK GALA.

Ex. The Journal of Horticulture.—" Messrs. Clibrans, Altriucham, had a small but beautiful group containing many interesting plants of a newer and rarer description, including Kalanchee flammea, Verbena Miss Willmott, new blue Marguerite Dimorphotheca Eckloni, the Old Man Cactus, Crossandra undulæfolia, Asparagus Myriocladus, Urceocharis Clibrani, Lobelia Mrs. Clibran, &c. Silver Medal.

# Hydrangeas.

Are splendid plants in Conservatories. They like rich soil, consisting of loam and manure in equal parts, and a copions supply of water may be given in the growing season. Artificial manure applied just as the flowers are developing is beneficial.

Purchaser's selection, 6d. each ; 5/- doz.; our selection, 4d. each ; 3/- doz. Blooming Plants 9/-, 12/- and 18/- per dozen.

No. 3 hortensls cyanoclada, blue; very attractive.
5 —— Souvenir de Clair, white flowers a marginal guard, central flowers like small blue stars. leaves variegated - variegata,

white.

- japonica, rosy-lilac changing to bright

- Jeanne d'Arc, pure white, large heads; stems black.

- marlesii, light pink, tinted mauve; 42 very large.

 nigra, rose, immense trusses. 18

- otaksa monstrosa, pale rose, floriferous, even in a young state.

26 — Sapphire, azure-blue, vigorous and free.

No.

30 hortensis, Thos. Hogg, white.

- tricolor, prettily variegated white and yellow. 33

Lindieyana, vigorous, floriferous variety; 37 flowers rosy

42 paniculata grandiflora, immense spikes of

fine white flowers in summer.
47 ramulus coccinea, "Red Branched," redcoloured branches, deep rose-coloured flowers.

52 stellata fimbriata, pure white, fringed, crimson spot in centre.

56 ---- rubra piena, the rosy-red blos-soms almost cover the plant, and remain in perfection longer than the

## Liliums.

Among bulbous plants the Lilium is unrivalled for the embellishment of a Conservatory. bulbs should be potted in the Autumn, and grown on as so to bloom in succession. Loam and peat in equal proportions, with a small quantity of sand will grow them well. After potting, plunge 6 in. deep in damp cocoa fibre, withholding water until top growth has commenced; place in a cold pit and protect from frost, removing to the Greenhouse as required. When coming into flower, liquid manure may be given with good result. Re-pot in fresh soil as soon as the stems die down.

#### In Autumn some varieties can be supplied at lower rates.

Those named below are most suitable for Greenhouse and Conservatory decoration. The undernoted prices are for plants in pots in full growth.

auratum, white spotted crimson, pale yellow band down each petal, each 1/-, 1/6 and 2/6.

Harrisil, abundant white flowers, 1/- and 1/6 each.

iongiflorum giganteum, white trumpet-shaped flowers, 1/- and 1/6 each.

speciosum (lancifolium) album, white. 1/- & 1/6 each.

aibum Krætzeri, immense white flower, with greenish band in centre of each 1/- and 1/6 each.

rubrum, white, red spots, shaded car-1/- and 1/6 each. mine.

During the Summer we can supply varieties of Lilium Speciosum in large pots containing six or seven bulbs in full growth at 5/-, 6/- to 7/6 per pot.

## Lantanas.

Bloom nearly eight months in the year; are seldom attacked by insects, and thrive in two parts loam, one part leaf-mould or decayed mannre; pot firmly and water freely whilst growing. Most useful plants for Greenhouse or bedding.

Purchasers' selection, 4d. each; 3/- doz. Our selection, 2/6 per dozen.

No.

Bengail, clear rose; floriferous.

9 Calypso, rose-coloured fading to yellow. 13 Cito, gamboge, passing to reddish-purple, 16 Comtesse de Blencourt, rose, orange-

vellow centre.

20 Corbeille d'Argent, pure white; free and attractive

24 Don Calmot, clear lilac, red centre.

28 Drap d'Or, bright yellow, most floriferous. 31 Farfadet, golden yellow, zoned orange,

and margined orange-red,

No.

34 Le Patriote, brilliant yellow, scarlet centre.

Rayon de Soleli, deep yellow, changing to 43 rosy-violet.

47 Reve Poitevine, rose, shaded silvery white.

51 Salviæfolia, rosy-lilac, very free.

55 Uitima, bright yellow.

Venusta, rich deep golden yellow, red

59 Victoriæ, pure white, salmon-lemon eye.

Seed-finest mixed; per packet 6d.

## Marguerites.

Invaluable for the Greenhouse, Conservatory, Window Boxes, Bedding, and similar purposes.

#### New Double-Flowered Variety.

2524 "Queen Alexandra." Flowers 2½ in. to 3 in. diam.; of the purest white, anemone centre; single, semi-double, and double flowers are produced on the same plant; the double flowers are produced in excess of the single ones. When placed in water, the flowers retain their freshness for a long period. 6d. and 9d. each.

#### General Collection.

Purchasers' selection, 4d. each; 3/- doz. Our selection, 2/6 doz. Plants in larger pots in bud or bloom 9/-, 12/- and 18/- doz.

110.
2514 frutescens nivalis compactum, white,
free. A.M., R.H.S.
2517 Golden Sun, rich yellow, flowers of large
size. A.M., R.H.S.
2520 Halleri-maxima, white.
2523 Mdm. Farfoulllon, white.
2525 Saharet, pure white, free.
2527 Triomphe de Versailles, white, dwarf.

# Mimulus Moschatus-Musk.

The "Mnsk Plant," Minulus Moschatus is known to all, but there are other varieties worthy of attention, possessing the exquisite odour of the type, with larger flowers, and are of more compact growth.

Price 3d. each; 2/6 per dozen.

grandiflorus, pure yellow. moschatus, the old-fashioned Musk. Harrisonii, grand variety, delightfully fra-

#### HORTICULTURAL AND CENERAL ESTATE VALUATIONS.

We shall be glad at all times to undertake the valuation of Nursery Stock, Garden and Estate Produce, for Compensation, Claims, &c. Having had many years of practical experience in all matters connected with the trade, we are in a position to assess current values and carry out any valuations entrusted to us with special care and prompt attention, combined with economy in charges.

#### THE FORMATION OF PARKS, PLEASURE CROUNDS, &c.

This branch of our business is in charge of a specialist, who has had many years' experience in all classes of Landscape work. The planting of Avenues, the laying out of Flower Gardens and Grounds, with or without rockery and water effects, carried out in the most natural style. The formation of Wild Gardens (now so popular) a special feature. Correspondence invited.

## Primula Sieboldi (Cortusoides).

#### Japanese Primulas.

A pretty class of Primulas producing large heads of charmingly fringed flowers, ranging from white, crimson, manve to lavender-blue; splendid for shady border or rock garden. They like a light soil with a mixture of leaf soil and decayed manure. As pot plants for a cool house they are suitable. The flowers under glass have a delicacy of tint and beauty seldom seen out of doors.

Purchasers' selection, 6d. each; 4/6 doz.; excepting those priced. 12 fine varieties, our selection, 3/-; 25 plants in 12 sorts, 6/-

No

342 Atlas, red; fine variety.

344 Brilliant, rich, rosy-crimson, dwarf and compact.

369 Mrs. Geggle, clear rosy-pink, fringed, grand.

No.

371 Mrs. Ryder, blush-white; large waxy flowers.

376 Purple Queen, rich purple; distinct.

379 Queen of Whites, waxy-white.

384 rosea alba, erect flowers.

390 **Sirlus,** rich crimson-scarlet, with a white eye.

392 Venus, white and lilac, free.

394 Victor, rosy-red, large, good form and habit, showy.

393 Ware's White, pure white, long stalks, free.

401 William Cilbran, lilac with white centre.

## Primula Sinensis Fimbriata.

"The Chinese Primrose"—Clibrans' Strain.

We have given much attention to improving the Primula and the result is a very fine strain equalling any we have seen in size of flower, freedom, habit and colour. The flowers are of immense size, round, of the finest substance, and beautifully fringed, and most distinct and varied in colour. A rich mixture of loam, leaf-mould, manure, and sand is the best compost for them. Careful attention should be given to ventilation, watering, and shading. They require plenty of water in the Summer, but in Autumn and Winter it must be used most sparingly.

Young plants of this splendld strain, from the beginning of June to the end of August, from stores, 1/6 doz.; 50 for 5/-; 100 for 7/6.

Young plants of this splendid strain from July to the end of September, in small Pots, 2/- per doz.; 12/6 per 100.

Larger plants, in 5 in. pots, during Winter and Spring, 6 - per dozen. Seed, 1/- and 2/6 per packet.

## Double Chinese Primulas.

These are charming plants for Conservatory or Greenhouse decoration during Winter and Spring months. For cutting purposes they are invaluable, the flowers never dropping, as in the single varieties. The following arc distinct and effective.

alba plena, pure white, each 9d. and 1/-

Annle Hiller, beautiful light pink, attractive, 1/6 each.

candldissima, white, superior to alba fl. pl. 1/6 each.

Earl of Beaconsfield, bright rosy-carmine. 1/6 each.

Marchioness of Exeter, white, slightly speckled pink. 1/6 each.

Stewartll, fine double-red variety, quite distinct. 1/6 each.

Seed saved from choicest-named double varieties, 2/6 per packet.

## Primula Obconica.

As a cool Greenhouse Plant for flowering in Winter and early Spring, Primula Obconica and its varieties are of the utmost value; grown in a cool temperature they never fail to produce an abundance of flower at a season when flowers are particularly acceptable.

Obconica, the flowers varying between white and pale lilac with the utmost profusion. 3d. each, 2/6 per dozen.

Larger 4/- and 6/- dozen.

— Grandiflora Brilllant, red, beautiful variety. 6d. each; 4/6 dozen.

Obconica Grandlflora Rosea, pretty rosecoloured variety. 4d. each; 3/6 per dozen.

—— Rose Queen, bright rose, 6d. each; 4/6 dozen.

During Autumn and Winter larger plants in 5 in. pots can be supplied at 6/- per dozen. Young Plants from Stores, Obconica, 1/6 dozen; other varieties, 2/- dozen.

# Rhododendrons (Greenhouse Varieties).

Should be potted very firmly in fibrous peat and silver sand with ample drainage. After potting keep in a moist atmosphere in a gentle heat. Water carefully until the roots have commenced to run in the new compost, after which the supplies must be gradually increased. When the growth is completed give plenty of air to enable the wood to ripen and develop flower buds. They should not be over-potted; every third year is usually sufficiently frequent, the most favourable time being April and May.

#### Our selection, 9/-, 15 -, and 25/- dozen; according to size.

Those marked (\*) are Sweet Scented.

No.

- \*2 albescens, glistening white, marked at the base sulphur-yellow. 1/-, 1/6 and 2/6 each.

- \*62 Suave, pure white, distinct. 1/- 1/6 to 2/6 each.
- \*63 Sesterianum, large white, elegantly fringed. 1/-, 1/6 to 2/6 each.
  65 Souvenir de J. H. Mangles, bright orange
  - yellow suffused rose-pink. 1/6 2/6 each.
- 68 Trlumphans, crimson-scarlet. 1st C.C., 1/6 to 2/6 each.
- 69 Veltchlanum, large white flowers, yellow at base, elegantly fringed. 1/6 to 2/6 each.

# Rhododendrons (Hardy Sorts) for Forcing.

The finest named varieties, scarlet, crimson, pink, white, &c., for forcing. Set with bloom buds, 30/- & 42/- per dozen.

#### Roses in Pots.

A full List of varieties of Roses cultivated in pots will be found on pages 55 to 61. An alphabetical Index of these will be found on pages 79 and 80. Varieties not included in this List are in our Catalogue of Roses, free on application.

#### OUR COLLECTION OF DAHLIAS.

We consider our collection of Dahlias as complete and representative as possible. Our aim has been, not to include every known variety, but to add only those that are of real nierit, showing an improvement on existing varieties. This has necessitated the trial of innumerable varieties, many of which have been discarded owing to their not reaching the

high standard of merit necessary to justify their inclusion in our collection.

We cordially invite inspection during August and September, when the plants are in They afford our friends exceptional opportunities of selecting and comparing the

different varieties.

We issue a separate List of Dahlias, gratis and post free on application.

## Salvias.

They produce their showy flowers in profusion when other blooms are scarce; the colours include intense blue, purple, scarlet, rose, striped and several intermediate shades. Rich soil is needed, loans and manure in equal parts.

Purchaser's selection 4d. each; 3/- dozen. Our selection, 2/6 doz. Blooming Plants, of Splendens type, in Autumn and Winter, 9/- and 12/- dozen.

No.

1 Azurea, sky blue, variety of great heauty.
2 Bethelll, rosy-pink, tipped white.

- Fireball, bright scarlet, very early.
  24 Heril, superb for Winter flowering, dazzling scarlet.
- 26 Leucantha, a white flowered species; long narrow lanceolate leaves.

28 Patens, rich blue; fine for borders.
31 rutllans, beautiful magenta; apple-scented foliage.

35 splendens alba, white form of Splendens.

--- atropurpurea, rich crimson.

4 splendens Boule de Feu, bright red in fine spikes.

Feu de Jole, bright red; good habit.
grandiflora, a glorious form, with larger flowers of more brilliant scarletvemilion than the type; numerous spikes, longer than in other varieties of splendens.

- Ruhm von Stuttgat, reddish-scarlet :

- Wilhelm Pfitzer, crimson-scarlet; 43 vigorous.

## Stove Plants.

In the growing season the heat should be kept to 65° and upwards, and the syringe used freely at least twice daily. Evaporating troughs should be filled, and air given according to the state of the wind and outdoor temperature. A rise of temperature from sun heat (not fire heat) up to 90° will be more beneficial than otherwise, providing the atmosphere is moist; dry heat must be avoided. Most of the plants in this section require peat soil, or a mixture of peat and loam, with a little old manure, sand, and leaf-mould. Liquid manure, or top-dressing with artificial manure, is beneficial to all when well established, if free growth and profusion of bloom are desired.

### New and Recent Varieties.

Croton elegantissimum roseum, leaves 12in. to 18in. in length, beautiful orange-red and dark green; inclined to be spiral;

dark red stem, fine table plant. 5/- & 7/6. - Golden Fleece, narrow twisted foliage, with broad gold band down centre, margined dark green; highly effective, striking variety. 2/6 to 3/6.

- Hercules, long, foliage mid-rib and veins outlined in gold and crimson; of bold imposing appearance.

imposing appearance. 2/6 to 3/6.

Dracæna Kewensis, deep green leaves, distinct from any other Dracæna, of great value for decorative purposes, being

strong and hardy. 1/6 to 2/6.

Dracæna Vlctorla, F.C.C., R.H.S., leaf bright golden yellow with central band of green, streaked greyish white; bright and constant; the golden yellow colour becomes

deeper with age. 10/6 upwards.
Dædalacanthus Parvus, A.M., R.H.S., bright violet-mauve in erect spikes; succeeds well in warm greenhouse, flowering during November and January. 1/- and 1/6. Exacum macranthum, rich indigo blue flowers and yellow anthers, free flowering and neat habit, attains a height of about 18 inches. 2/6.

Impatiens Holstii, resembles in habit, foliage, and shape of flowers, the well-known Impatiens Sultani, but of more rapid and vigorous growth, the flowers are a bright vermilion, a gorgeous colour, forming a lovely contrast to the dark green foliage. 9d. 1/- and 1/6.

-Ollvlerl, pale rosy pink flowers; strong growing species forming a large bush; does best in an intermediate temperature; a lovely plant. 1/- and 1 6.

Jacobinia Chrysosthephana, F.C.C., R.H.S., bright golden-yellow flowers borne in dense heads at the tips of the branches, forming a striking contrast to the olivegreen leaves; the plant is of easy culture and flowers freely throughout November and December. 2/6 and 3/6.

Pandanus Sanderi, Golden Pandanus, F.C.C., R.H.S., Gold Medal, Paris. In growth it resembles P. Veitchii, excepting that the leaves are longer and more recurved, giving the plant a more graceful appearance; its colouring is not white as in P. Veitchii, but rich golden-yellow, with centre leaves bronzy-orange. A feature in favour of this plant is that the variegation becomes stronger as the plants get older. 2/6 to 3/6.

#### Our Selections of Stove or Greenhouse Plants, excluding varieties which Purchasers already possess :---

l'welve in 12 varieties ... 9 -, 12/-- and 18 -Fifty in 50 varieties  $\dots 21/-$ , 31/6, 50/- and 75/One hundred in 100 varieties ... 52/6, 84/- and 126/-

Half of any collection at half price. The highest prices are for plants of larger sizes and choicer sorts. Any collection may be at purchasers option, wholly or partly flowering, or ornamental foliage.

### VARIETIES NOT LISTED CAN BE SUPPLIED.

# OUR SPRING LISTS.

In addltion to our List of Stove and Greenhouse Plants, Ferns, Palms, and all classes of plants for cultivation under glass, which are fully detailed and described, we publish the following Catalogues each Spring:—

### DAHLIAS.

A comprehensive and valuable list of all the best new and old varieties in every section.

## HERBACEOUS PLANTS.

A concise and useful list of all the best Alpine, Herbaceous, Bog and Aquatic Plants.

### BEDDING PLANTS.

An invaluable list for all who have to deal with "bedding." Useful pocket size,

## GARDEN REQUISITES.

Requisites and Garden Sundries of every description are included in this list.

We send all our Lists gratis and post free.

## Stove Climbers.

## New Bougainvillea "Maud Chettleburgh." 🦜

(AWARD OF MERIT, R.H.S.)

"The Garden," of July 30th, 1904, describes this variety: "When shown at the recent Holland House Show, this new Bougainvillea—the finest yet introduced—created much interest. Some of the growths were 4ft. long, and bore numerous branches of showy bracts 2½ in. deep and 2in. wide of a rich rose-purple colour. Their large size and rich colour produce a striking effect. It blooms splendidly in a small pot, although to be seen at its best it needs to be trained on the roof of a greenhouse or stove. 1/6, 2/6 to 3/6.

#### General Collection.

We have beautiful specimens for immediate effect of most climbers, such as Stephanotis, &c., which have flowered for the last few years and are in fine condition for covering roofs, &c., or growing as exhibition plants; we invite inspection, or shall be pleased to send full particulars on application.

COLLECTIONS OF CLIMBING PLANTS-OUR SELECTION.

Six in 6 beautiful distinct sorts, 5/-, 7/6, 10/6 and 15/-

Twelve in 12 beautiful distinct sorts, 9/-, 15/-, 20/- and 25/-

# Streptocarpus—Hybrid Seedlings.

From a large flowered brilliantly-coloured, strong strain, covering a wide range of colour, white, heliotrope, lilac, magenta, rosc, pink, etc. These seedlings surpass the old named kinds, and for that reason we have discarded our named sorts.

Price, 6d. and 9d.[each\*; 5/- and 7/6 dozen. Seed of our superb strain, 1/- per packet.

## Succulents.

An interesting class distinct from others in habit, foliage, and flowers.

Twelve Succulents, in 12 sorts, from following list, for indoor culture, onr selection, 4/-, 6/- and 9/-.

## Sweet Peas.

For the production of a large number of flowers for general decorative purposes, the Sweet Pea has become exceedingly popular.

We offer the most distinct varieties in separate colours, white, pink, red, and blue, in 3 in pots, each pot containing several strong established plants hardened off ready for planting out, 4d. each, and 3/- per\_dozen, ready beginning of April.

## New Varieties.

We can supply single plants in  $2\frac{1}{2}$  inch pots of the following choice new varieties. Ready in April.

Price, 3d. each; 2/- per dozen, except where otherwise stated.

Beacon, standard, bright carmine, flushed mauve on a cream ground; wings, clear primrose.

Cyrii Breadmore, deep rose self, a lovely flower.
David R. Wliilamson, rich medium blue, fine.
Evelyn Breadmore, shining pearly white,
standard slightly tinged pink.

Evelyn Byatt, standard, rich orange salmon, slightly deeper in the wings, a glorious flower.

George Herbert, standard, orange pink, wings deep rose, a lovely flower. 4d.

Helen Lewis, standard, orange, large and waved, wings rose.

Heien Pierce, mottled and marbled bright blue on a white ground, unique.

Henry Eckford, intense bright orange self, superb. 6d.

John Ingman, rose majenta, flushed crimson, very large.

Lady Aberdare, soft pink, deepening towards the margin, a lovely colour.

Miss H. C. Philibrick, shade of mauve, with pale blue sheen.

Physils Unwln, deep rosy carmine self, grand.

Queen Aiexandra, beautiful scarlet self.

superb variety. 6d.

Sybii Eckford, rich apricot and lemon, a fine flower.

Unique, white ground, flaked pale blue.

### Herbaceous, Alpine, Bog, and Aquatic Plants.

We have an immense stock of the above in the best of health and condition. We shall be glad to send you our list, gratis and post free.

## Tropæolums.

Handsome Trailers for Conservatories, &c., their brilliant blooms standing out in charming relief against the green foliage. The dwarf varieties are indispensable for bedding.

Marked (c) are Climbers, (D) Dwarf varieties.

Purchasers' selection, 4d. each; 3 - dozen. Twelve, in 6 varietics, our selection, 2/6.

No.

2 Annie Clibran, rich golden-yellow, crimson blotch; fragrant.

6 Bowdon Beauty (Clibran), deep maroon,

flaked orange.

c 10 Clibrans' Gem, rich crimson-maroon, pro-fuse in Summer or Winter. As an outdoor Summer Climber invaluable.

c 14 Dr. Mules, crimson, splendid for training over rockeries, &c., rapid grower.

c 18 Gloire de Bordeaux, very double, bright

scarlet-yellow, washed gold. d 28 Mrs. Clibran, pure golden-yellow, produces a brilliant display, habit dwarf.

No.

c 31 Mrs. William Plant, deep yellow, effective trailer for Conservatory

d 34 nanum fl. pi. Hermine Grasshoff, dark orange-red, double, free; splendid for cut flowers.

 Varlegatum, light scarlet, foliage variegated creamy white. d 35 -

c 41 Phœbe, pleasantly-scented, golden-yellow, crimson feather on each petal.

c 45 Richmond Comet, retains all the characteristics of Canariensis in the shape of flower, with the freedom and strength of Fireball; excellent winter variety.

d 56 The Queen, orange-searlet, profuse

bloomer.

## Verbenas.

For Greenhouse or Bedding, Verbenas make a pretty display; when cultivated under glass care should be taken to fumigate at intervals to ward off attacks of insects. A cool temperature at all seasons, together with a free circulation of air, and a free supply of water, during the Summer, suits them admirably.

Ellen Willmott, the finest variety for pots, lovely pink with a white eye; a good grower and a free bloomer; the finest of its colour. 4d., 6d. & 9d. each; 3/-, 4/6 & 6/- per dozen.

In variety, 3d. each; 2/6 per doz.

A full list of varieties appears in our List of Bedding Plants,

### Vines.

Our collection of Grape Vines will be found Listed on page 62. We make a speciality of these, and wish to direct special attention to them.

Ex. The Garden.—Among the great nurseries of Britain must be reckoned that of Clibrans, Altrincham, partly on account of its extent, partly because of the representative collection of plants it contains, but chiefly because of the up-to-date and successful methods of cultivation that are here practised. Firstly, as to the extent of the nurseries. They cover approximately 300 acres of land, exclusive of five acres of glass houses, and between 250 and

300 nien are regularly employed.

In addition to the establishments at Altrincham, Clibrans are also found at Bowdon, Cheshire; their seed and bulb business is at 10, Market Street, Manchester; the floral depot is at 12, Market Street. It is well to impress upon visitors that although Clibrans, Altrincham, is the address of the firm, Hale Station is much the nearer of the two. For the past two years the glass houses, offices, and packing department have been in course of removal from Altrincham to Hale, and the new establishment at the latter place is fast nearing completion. The newly-erected glass houses are models of convenient and economical working. All are span-roofed and 180ft. long, although some are wider than others. The largest are 21ft. wide, and the smallest have a width of 11ft. Miniature train-lines are laid down the pathway of each house, and the value of the trolleys which run upon them for transferring plants from house to house or from different parts of the same house, can hardly be overestimated.

It should be mentioned that when the scheme is completed there will be a corrider at one end of the block of houses, also with a tramway along the centre, and this will be connected with the packing shed. It will thus be possible to remove plants from the houses to the packing shed by means of the light tramway without once taking them ont of doors. Another innovation that tends greatly to lessen labour in Messrs. Clibrans' glass houses is the provision of water pipes beneath the stages, with taps at intervals of every 10 feet. Watering by means of cans is (except in the case of the more tender plants and young seedlings), practically dispensed with; a small hose pipe is fitted to the end of the tap, and by this means one man can quickly water a houseful of plants. The new packing shed is a large span-roofed building (large enough to accommodate a dozen vans and carts at one time). The length is 230 ft., and the width 105ft. One part is enclosed and heated specially for the packing and despatch of tender plants. The offices are ranged upon one side and end of the shed, to which easy access is obtained.

**SPECIAL NOTE.**—Roses in Pots are a special department, four large houses being almost solely devoted to their cultivation. Our plants are renowned for their strong, sturdy, healthy, well-matured growth, and never fail to grow satisfactorily and flower profusely.

An Alphabetical Index of all varieties of Roses contained in this list appears on pages 79 & 80.

# ROSES IN POTS.

All the varieties in the following list (with a few exceptions) can be supplied in pots; other varieties not included can be supplied in their season from the open ground. A full List of all sections of Roses appears in our Rose Catalogue, post free on application.

PRICES.—Strong plants in 5in. pots, 1/- and 1/6 each; 10/6 and 15/- per dozen, excepting those priced. Our selection, 10/- per dozen.

Varieties marked (†) are Climbers, and can be supplied with long growths 8ft. to 12ft. in length, splendid plants ln 7in. pots 2/6 and 3/6 each. 25/- and 35/- per dozen.

The majority of varieties not marked as above can be supplied as strong bush plants trained to four stakes, in 7in. pots, 2/6 and 3/6 each, 25/- and 35/- doz.

Extra-sized specimens of the best varieties of Climbing and Bush varieties, can be supplied at 5/-, 7/6, 10/6, 15/- and 21/- each.

# Bourbon Roses (R. indica bourboniana).

The shoots of these varieties should not be pruned short excepting Nos. 1018, 1033, and 1034. Marked (c) are climbing varieties, suitable for pillars, &c.; (f) for forcing or pot culture.

No.

†1010 Climbing Souvenir de la Maimaison (FC), blush white.

1018 Kronprinzessin Victoria (FC), outside milk white, iuside sulphur yellow, free and early as a forcing rose No.

† 1024 Madame Isaac Perelre (FC), vivid carmine, immense.

†1026 Mrs. Paul (FC), blush white, rosy peach shading.

1033 Souvenir de la Malmalson, Blush, blush white, shaded flesh.

## Noisette Roses (R. moschata Noisettiana).

The Noisettes flower mostly in clusters through the Summer and Autumn, and are generally very free bloomers. Many make fine pillar roses. In pruning them old wood should be thinned out, and new wood left nearly full length. The vigorous growers are well adapted for Climbing, Pillar, or Weeping Roses, flowering freely late in the year. This section, like the Teas, do well in pots, also for our-door cultivation in favourable situations.

The hardiest varieties are marked (h); those requiring a wall (w); Pillar Roses (p); Exhibition Roses (e); and Forcing Roses (f).

No.

†1121 Aimee Vibert (HP), pure white, large clusters, rambling.

†1122 Alister Stella Gray (HWP), bright yellow, large clusters, from early Summer until late Autumn.

†1125 Bouquet dOr (HW), pale yellow, copper centre.

†1128 Celine Forestler (HPE), yellow, centre deeper.

†1133 Golden Queen, rich golden yellow shaded copper; rapid grower.

†1139 L'Ideal (HW), sweet, yellow and metallic red, shaded dazzling gold.

No.

Madame A. Carriere (HP), creamywhite, for pillars, arches, or pegging down.

1143 —— Caroline Kuster (HWE), pale yellow, deeper centre.

Plerre Cochet (P), golden yellow, passing to cream.

†1147 Marechal Niel (HWPE), rich decp yellow.

†1150 Reve d'Or (Hw), deep yellow, rapid climber.

†1155 Wm. Allen Richardson (HWF), beautiful orange yellow.

We shall be glad at all times to undertake the valuation of any kind of Nursery Stock, Garden and Estate Produce, for Compensation Claims, &c. Having had many years of practical experience in all matters concerned with the trade, we are in a position to assess current values, and carry out any valuations entrusted to us with especial care and prompt attention, combined with economy in charges.

## Tea-scented Roses (R. indica odorata).

This important class is admired for delicious fragrance and delicate tints of colour. For planting out in Conservatories, forcing, or pot culture they are unequalled, and with good cultivation a plentiful supply of flowers may be had through the season. To be successfully grown out of doors they must be planted in the sunniest parts of the garden, in well-drained, light, rich soil, and given an abundant supply of water during the hot weather, and slightly protected from frost in severe winters with fern, fir, or furze branches, earth up the Plants like celery to about oin. high, removing the soil in April, and pruning well back. Teas generally should not be pruned very closely, but weak or unripened wood ought to be cut out entirely.

#### Tea Roses for growing out-doors, for Beds, Climbers, &c.

To meet the demand for Roses to fill up blanks in, or to make new beds we grow in pots large quantities of H.P. Tea, H.T. Noisette, and miscellaneous roses in the open, and can supply at 12/- and 18/- doz., 90/- and 125/- per 100.

#### New and Choice Varieties.

No.

1215 Climbing Papa Gontler, counterpart of Papa Gontier, but of a climbing 2/habit

1707 W. F. Bennett (F), crimson, very fragrant.

## China Roses (R. Indica).

These roses grow well in small pots, and are good for planting in any situation where a constant succession of flowers is desired. They are tolerably hardy, of moderate growth, and succeed best in warm, dry soils, with a moderate dressing of well-decayed manure and leaf mould once a year, Thin ont the smaller shoots, and prune moderately about the beginning of April. For protection in severe Winters cover with a few inches of soil or sand.

### New Varieties.

No.

1714 Arethusa, dcep yellow, tinted apricot, very free; lovely variety. 1/-

1733 Field Marshal, a climbing variety of the Crimson Chinese Rose (R. Semperflorens), deep blood crimson shaded with amaranth. 1/6 to 3/6.

#### General Collection.

In pots, Purchasers' selection, 9d. each, 7/6 doz.; our selection 6d. each, 5/- doz.

No.

1717 Blush, (common), monthly rose; bright pink.

1744 Queen Mab, soft rosy-apricot, centre shaded orange.

White Pet, see Little Pet.

# Polyantha Roses (R. Polyantha Hybrida).

Often called "Fairy Roses." Admirably adapted for pot culture; flowers small, borne in clusters, pretty for Conservatory (contrasting effectively with other flowering plants), and also good for outdoor beds and borders, their lovely miniature double flowers showing well against the massive blooms of the popular H.P.'s A bed of "Polyantha Roses," in variety with the old blush or crimson china, will provide a beautiful sheet of colour for many weeks.

## New and Choice Varieties.

No.

1756 Blush Rambler, rich blush shading lighter in the centre. 1/6.

1778A Lady Gay (A.M., R.H.S., 1905).—One of the most beautiful of all garden roses that have been introduced for some years, a seedling from the popular Crimson Rambler, which it resembles in habit of growth and general effect; flowers produced in large clusters are of delicate cherry pink, which fades to a soft white, leaves deep glossy green. Vigorous, and perfectly hardy. 3/6 & 5/-

No.

1793 Madame N. Levavasseur, in colour, form of flower and trnss, it is a counterpart of Crimson Rambler, but does not climb. An almost perpetual bloomer from May until Autumn, charming for pots or bedding. This variety has created a sensation wherever exhibited. 1/- each, 10/6 per dozen.

1822 Philadelphia (A.M., R.H.S., 1905).— Stated to be an improvement on Crimson Rambler, possessing larger and more double flowers of a brighter colour that do not fade. 2/-

#### Roses in Pots-Polyantha Roses-continued.

### General Collection.

For prices, see page 55.

## Various Other Roses.

HYBRIDS of CHINESE and BOURBON. ROSA RUGOSA. SWEET and PENZANCE BRIARS. AUSTRIAN BRIARS. SCOTCH ROSES.

PROVENCE and STRIPED PROVENCE.

WICHURIANA ROSES, and many other
species and varieties.

All strong established plants, in 6\fin. pots, at 12/- to 18/- per dozen.

NOTE.—An alphabetical index of all varieties of Roses contained in this List will be found on pages 79 & 80. For varieties not found in this List, see our special Catalogue of Roses, gratis and post free on application.

# Figs.

Figs will grow in almost any soil, but if it be too rich they produce much wood and very little fruit. Exuberance of growth can best be restrained by limiting their rooting area, and making the soil firm. They require a considerable amount of moisture when the fruit is swelling. Good drainage is also essential, chalk being one of the best things to use for this purpose where it can be procured, and failing this brick rubbish. In all cases lime ought to enter into the composition of the soil or compost in which they are grown. When grown against walls they should be trained horizontally; this checks their humriant growth, and assists the wood to ripen, as unless the wood is thoroughly ripened they will not bear fruit. The knife, as a rule, should be used very sparingly on the ripened wood, though, of course, exhausted or useless branches should be removed as soon after the fall of the leaf as possible. They may be grown out of doors in gardens near the sea, in warm localities, and under favourable conditions on a South wall. "Brown Turkey," "White Marseilles" and "White Ischia," are best for out-door cultivation, the remainder are most suitable for pot culture or planting out under glass.

Bushes in pots, 2/6, 3 6, 5 -, 7/6 and 10 6 each. Small plants, 1 6 each.

A few extra-sized specimens, sizes and prices on application.

A limited number of plants can be supplied trained flat, for walls, &c., at 5 - and 7 6 each.

No.

Bourjasotte Grlse, flesh deep blood-red, luscious flavour; a constant bearer.

Brown Turkey (Lee's Perpetual), brownish purple, bluish bloom; juicy and rich, abundant cropper; hardy, excellent forcing variety.

6 Early Vlolet, flesh red, rich flavour, early, remarkably prolific; good for pots.

Hirtu du Japan, new variety from Japan, said to be of compact dwarf habit and very prolific, fruits purple with white flesh speckled with brown imperfect seed and cream tinted heart, is said to be unequalled for pot eulture. Strong plants in 5in. pots 2/6 to 5/- each.

TZO.

- 14 Negro Largo, large, flesh pale red, juicy, highly flavoured; free.
- 17 Osborn's Prolific, flesh milky-white, exquisite flavour; bears freely; good for pots.
- 23 St. John, tender flesh, delicious flavour; remarkably free setter; excellent for forcing, early
- 29 White Ischia, flesh dark red, juicy, sweet and rich; great bearer.
- 30 White Marseilles (White Genoa), flesh almost transparent, sweet and rich; productive; hardy and early.

The system of issuing a separate list for Dahlias, Indoor Plants, Herbaceous and Alpine Plants, Bedding Plants, and Sundries, tried last Spring, has, we are informed, been found more convenient to the majority of our customers, than the large list embracing all the plants bought in Spring. We find it is more costly for printing and postage, but being anxious to issue the lists in the most generally acceptable form, we are following the same system this Spring. We should like to know from our customers generally, their opinions and also welcome suggestions to improve the catalogues and make them more generally useful. It may be of interest to mention that we issue about 175,000 copies of our various lists, yearly, at a cost of about £1,000 for printing alone. In addition to this, we pay postage on all lists sent out.

# Grape Vines.

We can strongly recommend our Forcing and Planting Canes to the notice of buyers. They are grown without bottom heat, have an abundance of good fibrous roots, and are exceedingly strong, short jointed, and thoroughly well ripened.

Strong Planting Canes, 3/6 and 5 - each. Strong fruiting Canes, 7/6, 10 6 and 12/6 each.

  - 56 Trentham Black, large berries, rich, juicy, and sugary, with a flavour resembling the May Duke Cherry.
  - 62 White Frontignan, medium-sized berries, rich flavour, abundaut bearer.

## To Employers requiring Head or Under Gardeners, Head or Assistant Foresters, or Farm Bailiffs.

We shall be pleased to send our list of names and addresses of suitable men, with full particulars of wages required, experience and references. Great care is taken that no man shall be placed on the register whose character is not good. Our acquaintance with the men's abilities and character cannot but be of service to all needing men, as the difficulty of selecting from scores of answers to an advertisement or from applicants of whom nothing whatever is known, is felt by every employer of labour; frequently it is noticed that preference is given to an inferior man and much better men passed over.
